WORKING IN PARTNERSHIP WITH HEALTHCARE PROFESSIONALS

Pennine® HEALTHCARE
Adult Anaesthetic Systems

Mapleson A: Parallel Lack System
This system is designed to be used with a re-usable APL valve and also in a circle system.

Specifications:
- Two lengths of corrugated tubing
- Two 22mm end connectors
- Parallel ‘Y’ piece 22mm male/15mm female

Mapleson C: Adult Bagging System
This system is used in Critical Care units, Theatre Recovery, and the Accident & Emergency Department.

It is used as a resuscitation device and during the transportation of patients when manual bagging is required.

Specifications:
- 1.925m corrugated tubing for fresh gas supply with 15mm male/22mm female connector and flexible flow adaptor
- APL valve
- Mask angle
- 2 litre reservoir bag

Mapleson D: Complete Bain System with APL Valve
This system is a co-axial version of the Mapleson D system. It is lightweight, compacted and useful where access to the patient is limited. The reservoir bag can be removed and a ventilator connected for mechanical ventilation of the patient if necessary.

Specifications:
- 1.8m / 2.4m corrugated tubing (custom lengths available)
- 2 litre reservoir bag
- APL valve
- 22mm swivel mount

The PENNINE Adjustable Pressure Limiting (APL) valve is a one way spring loaded valve that has a pressure release safety mechanism that actuates at a pressure of approximately 60cm H₂O.
Critical Care Systems

Basic Ventilator Circuits
This standard system connects the patient directly to a ventilator and is commonly used with a Heat Moisture Exchange Filter.

Specifications:
- 1.8m corrugated tubing 22mm/ female end connectors
- Parallel ‘Y’ piece, 22mm male/ 15mm female

<table>

Ventilator System with Water Traps
This system is designed to be used in conjunction with humidification systems and includes two water collection traps and a spare limb.

Specifications:
- 1.6m corrugated tubing (22mm diameter)
- 22mm female end connectors
- Water collection traps
- Parallel ‘Y’ piece 22mm male / 15mm female
- Spare limb (0.7m)
- Temperature monitoring port

Heated Wire System
This system is designed to be used in conjunction with humidification systems. It incorporates a heated wire on the inspiratory limb and water collection trap on the expiratory limb.

Specifications:
- 22mm diameter corrugated tubing
- Female end connectors (22mm diameter)
- Parallel ‘Y’ with temperature monitoring port 7.6m (22mm male/15mm female) with cap
- Heated wire
- Spare limb (0.7m/0.875m)
- 22mm male/female connector
- Water collection trap
- Temperature monitoring port

LATEX FREE
CPAP Systems & Paediatric Neonatal Systems

Systems for CPAP
This is a standard 22mm CPAP system to be used with a CPAP valve.

Specifications:
- 1.5m corrugated tubing (22mm diameter)
- ‘T’ piece 22mm male/15mm female

Standard Paediatric Breathing System
The infant ‘T’ piece is the most routinely used Paediatric Anaesthetic System. Dead space is reduced by the fresh gas flow entering the system directly at the elbow connector.

Paediatric Ventilator Systems with Water Traps
Designed to connect patient to ventilator and is commonly used with an HMEF, for Critical Care.

Specifications:
- 1.5mm diameter corrugated tubing
- Female connectors (22mm diameter)
- Parallel ‘Y’ Piece (22mm M/15mm F)

Standard Neonatal Ventilator System
Specifications:
- 1.5m, with manifold monitoring port
- 11mm diameter corrugated tubing

Catheter Mounts

The catheter mount is connected between the patient and the breathing system.

The catheter mount with double swivel connector and flexible tubing provides mobility and flexibility to the patient end of the circuit.
